Trần Hải Đăng

AI ENGINEER INTERN

0328589712 haidangtran.work@gmail.com github.com/haidangcodes Ho Chi Minh City, Vietnam

OBJECTIVE

Final-year IT student combining a strong foundation in Full-stack Development with a deep passion for Applied AI. Highly motivated to leverage LLMs and Prompt Engineering to optimize operations and solve real-world bottlenecks in the E-commerce industry. Proven ability to independently architect, build, and deploy end-to-end AI applications that deliver practical business value.

EDUCATION

HUTECH UNIVERSITY 2022 - Present

Major: Software Engineering

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems.

FEATURED PROJECTS

E-COMMERCE RAG ASSISTANT 2/2026 - 3/2026

Github: https://github.com/haidangcodes/Chatbox-RAG.git

- **Role:** AI Developer
- **Description:** An enterprise-grade Retrieval-Augmented Generation (RAG) chatbot designed to automate customer support using internal policies and live website data.
- **Tech Stack:** Python, Streamlit, LangChain, ChromaDB, Gemini 1.5 API, HuggingFace.
- **Core Functionalities:** Built a dynamic data pipeline supporting both PDF document ingestion and real-time Web Scraping. Engineered a history-aware retriever to provide conversational memory for complex, follow-up queries. Integrated local HuggingFace embeddings (all-MiniLM-L6-v2) with Gemini API, optimizing for real-time streaming responses.
- **Business Value:** Eliminated AI hallucinations by strictly grounding responses in verified company data, ensuring accurate policy communication and significantly reducing the workload for human support agents.

RECRUITMENT SUPPORT SYSTEM 11/2025 - 12/2025

Github: https://github.com/haidangcodes/RecruitPro_Springboot

- **Role:** Full-stack Developer
- **Description:** A full-stack web platform connecting job seekers and employers.
- **Tech Stack:** Java (J2EE), HTML/CSS, JS, Relational Database.
- **Core Functionalities:** Architected the database, implemented role-based access (Employer/Candidate), and built an optimized job search engine.
- **Business Value:** Streamlined the hiring pipeline, enabling faster and more accurate candidate matching.

TECHNICAL SKILLS

Programming Languages

- Python
- JavaScript / TypeScript
- Java / C#

Applied AI & Data

- Prompt Engineering
- LLM API Integration (Gemini, OpenAI)
- Pandas (Data Manipulation)

Web & Deployment

- Streamlit *(Rapid AI Prototyping)*
- ReactJS / Node.js
- Java Spring Boot / ASP.NET Core
